

Getting around during US 41 construction

Planning your route

There will virtually always be a lane of traffic flowing in both directions in construction zones on US 41. You can feel free to use the same route and transportation you've traditionally used on highway 41, or select an alternate route. Plan ahead and expect delays during peak travel periods. There are also several environmentally friendly group transportation alternatives you may consider, available in both Brown and Winnebago counties:

Wisconsin's Rideshare Program
